

# BENO

December 2025

The Bioethics Network of Ohio (BENO) has a 30+ year history of educating and serving as a resource for healthcare professionals across Ohio who, as a part or for the whole of their job, engage with ethical issues at the bedside, are involved in reviewing or creating ethics-related policies, or seek to enhance the ethical culture at their institutions. The success of the BENO is due to our members. We are sincerely grateful to our many colleagues who contribute to BENO, both financially and with their time and ideas about how to increase the impact of BENO's mission.

With that in mind, we ask you to consider becoming a member. As an organization that offers ethics education and a variety of other ethics resources across the state, BENO works hard to provide our members and their institutions with content and services intended to enhance their work engaging with ethical issues related to the delivery of health care.

As a BENO member, your support would us continue to provide opportunities such as:

- An annual conference highlighting a range of relevant bioethics issues. Plans are being finalized for our 35<sup>th</sup> conference, to be held virtually on **Thursday and Friday, February 26<sup>th</sup> - February 27<sup>th</sup>, 2026**. With a theme of “ ,” the conference promises to be a very special and timely event!
- Reduced conference registration for members
- Virtual educational sessions focusing on current issues, with members-only access to the library of recordings
- A quarterly newsletter (BioQuarterly), sent virtually to every member
- A growing resource for sharing best practices in clinical ethics consultation and other common approaches to ethics-related issues at the organizational/system level

**You can now take advantage of easy, ONLINE membership. Be sure to set up an account first on our website at [www.BENOethics.org](http://www.BENOethics.org), or you can join by check using the enclosed form.**

We appreciate your consideration of becoming a member!

*Warm regards and best wishes for a healthy 2026!*

Joshua Crites, PhD  
BENO President
